

# Auto 1 Turned Halfmoon (20 tips) - Build Sheet

## Visuals

### Rack Assembly

## Materials & Cuts

- **Carbin:** 43 1/4" length
- **Tips (20 total):** 1/4", 3/16", or 1/8" rod, 12" long

## Instructions

- 1 Cut Carbin:** Cut the main carbin spine to its 43 1/4" length.
- 2 Bend & Weld Tips:** Bend the rod for the 20 tips using a jig in a press, then use a vise to make the final 90° angle. Weld them onto the spine according to the spacing notes.

## Hook Spacing

First tip starts 3/4" from the top. Then, there is 2" spacing between each subsequent tip.
